

Thomas MOLINA

22 years old Full Stack Web Developer

EXPERIENCE

August 2017 – September 2018 PandaLab SAS – Nancy

Full stack web developer

I worked with a small team on the development of an instant messaging application for medical staff. I created several internal services from scratch as well as new feature on the core messaging application. Technologies I got to work with are Node.js, Vue.js and MongoDB.

April 2015 – July 2015 CETELOR – Épinal (*Internship*)

Web developer

Creation of a website used to track internal experiment results. I worked with PHP and MySQL, but also discovered the basics of WinDev's HFSQL.

July 2013 – December 2013 Linvosges – Gérardmer (*Internship*)

Web developer

Creation of a plugin for a ticket manager website. The plugin was coded using PHP, and the database system used was MySQL. The second part of my internship allowed me to work with SAP BusinessObjects.

EDUCATION

2012-2018 EPITECH (France)

EPITECH Graduate Diploma in Information Technology

After graduating into my A level, I chose EPITECH because of the new education format based on self-learning and adaptation, it allowed me to improve and work on myself a lot while learning computing and coding.

2016-2017 First semester Griffith Dublin College (Ireland)

Graduate Business School

I got the opportunity to study one year abroad thanks to EPITECH, I chose Ireland because I wanted to improve my English, and especially Griffith Dublin College because it allowed me to spend one full semester in business and I wanted to discover a complete new area of skills. During this semester I studied notions about international business

2016-2017 Second semester Griffith Dublin College (Ireland)

Computing Science Faculty

I finished this year abroad studying computing for a full semester. I was able to discover mobile development and data structures.

ABOUT ME

Graduating in September, I am currently looking for a Web Developer job in a JavaScript oriented environment.
